

## **Water Resources Analyst**

\$69,755-\$73,997/yr. See complete [job description](#)

To assist the natural resources program in its efforts to protect and restore the quality of the Cape's groundwater and surface waters. Multi-task position in a planning, technical assistance and regulatory program including water supply protection, restoration of marine and pond water quality, wastewater, watershed and storm water management.

Position requires a Master's degree in hydrogeology, environmental science/resource management engineering or related with 3 years of experience or equivalent combination of education and experience. Candidate should have proven quantitative and communication skills, knowledge of State and Federal groundwater and related environmental laws and regulation; familiarity with Cape Cod a plus.

Please apply on line at <https://www.barnstablecounty.org/barnstable-county/employment-opportunities>. Position open until filled.
